

# 4 Steps

## True or False

It's better for the environment to take your car to a car wash.

[Answer Below]

## Did You Know

Recycling one aluminum saves enough energy to run a television for three hours.

## Think Small

No effort is too trivial or too small when it comes to doing something positive for the environment.

## Answer

It is better to take your car to a car wash because they recycle the water used to clean cars.

## WE CAN'T SAVE THE WORLD

It's true, we can't save *the* world (it's too big) but we can make a difference in *our* world (through small changes).

These are three simple things we can do at home, at work, and on our block that can have a positive impact on the environment.

### Drink

Carry your own water bottle or coffee cup and use a lot less plastic.

### Grow

Grow your own herbs, plant a tree, or buy locally grown produce.

### Share

Trade, share, or sell items you no aren't using.

### Act

Pick up litter at the local park or on your block.
